

President Biden and VP Harris’s Pivotal Actions on Immigration vs Trump, Vance and Project 2025’s Agenda

President Biden and Vice President Harris inherited a nearly-collapsed immigration system that separated families, created chaos on the southern border, jeopardized the lives of Dreamers, and dismantled America’s legal immigration system. Since Day One, the Biden-Harris administration has delivered policies to restore order and safety at the border, keep American families together, address the root causes of migration, and expand legal pathways. President Biden issued over 500 executive actions, including over 300 actions to undo harmful Trump-era immigration policies. These pivotal actions have strengthened America’s border security, allowed over 2 million immigrant workers and families to get on path to legal status, created effective processes to reduce and manage migration, and fueled the country’s economic growth.

This incredible progress on immigration is now being threatened by GOP presidential candidate Donald Trump, J.D. Vance and Project 2025. Vance, who has [endorsed](#) Project 2025, supported [several anti-immigrant bills](#) in the Senate and previously [defended](#) Trump’s comments about migrants “poisoning the blood of America,” is aligned with Trump’s [extreme agenda](#) that would rip families apart and see long-settled immigrants deported en masse.

If elected, a Trump-Vance administration will finish what Trump began in 2017 and employ Project 2025’s dangerous blueprint to disrupt, detain and deport families and devastate America’s immigration system, jeopardizing the country’s economy, communities, and families.

<p>The Biden-Harris Administration addresses root causes of migration.</p>	<p>Trump ignores the root causes of migration and wastes money on short-term band-aids.</p>

Vice President Harris is [leading](#) the Administration's initiative to address the root causes of migration. Harris's focus has been on El Salvador, Guatemala, and Honduras, implementing the Administration's [Root Causes Strategy](#) to enhance security, governance, human rights, and economic conditions in the region. Steps taken to soothe the root causes of migration include providing humanitarian aid, combating sexual, gender-based, and domestic violence, launching an anti-corruption task force, forming anti-smuggling task forces, securing international support for Central America, and encouraging investment to expand economic opportunities for communities in the region.

Under Trump, synthetic opioid overdose deaths rose by [192%](#), and fentanyl-related deaths increased by [51%](#) between 2019 and 2020. The Government Accountability Office even [criticized](#) his administration for failing to develop a national opioid strategy as required by law.
